Come with me to see how you can make maths easier. We're going to learn how to:

- **find** friendly numbers,
- **make** friendly numbers,
- **fix** changes to numbers.

2

Friendly numbers end in 0. They are easy to work with.

10 is friendlier than 9

10 is friendlier than 11

20 is friendlier than 19

40 is friendlier than 38

70 is friendlier than 71

3

Let's practise **finding friendly numbers**. Circle the friendly numbers in each pair.

9 or **10**

39 or 40

20 or 23

78 or 80

4

Sometimes you can find pairs of numbers that add up to a **friendly number**.

Find the **friendly pairs** that add up to 10 and circle them.

9 + 5 + **1** friendly pair

5 + 5 + 7

2 + 3 + 8

4 + 9 + 6

1 + 7 + 3

5

What if I can't **find**
a friendly number?

$$54 + 44$$

$$27 + 12$$

$$38 + 61$$

Don't worry, there's not
always a friendly number to
find – sometimes you need
to **make** a friendly number.

First you need to look
for a number that can be
made friendly.

6

Find the number in each
addition that is easy to
make friendly, then circle it.

$$\textcircled{9} + 7$$

$$21 + 34$$

$$6 + 18$$

$$39 + 17$$

7

Now, change these numbers to **make**
them friendly and show how you did it.

10

18

39

8

You can **fix** a change by doing the **opposite** of what you did to make a number friendly. **Fix** the change in these additions.

change

$$\begin{array}{ccc} 9 & + & 7 \\ \downarrow +1 & & \downarrow -1 \\ 10 & + & 6 \end{array}$$

fix

$$\begin{array}{ccc} 21 & + & 34 \\ \downarrow -1 & & \downarrow \\ 20 & + & \square \end{array}$$

$$\begin{array}{ccc} 6 & + & 18 \\ \downarrow & & \downarrow +2 \\ \square & + & 20 \end{array}$$

$$\begin{array}{ccc} 39 & + & 17 \\ \downarrow +1 & & \downarrow \\ 40 & + & \square \end{array}$$

9

You can also **make** friendly numbers by breaking larger numbers into place values.

Can you **make** these numbers friendly?

$$27 = 20 + 7$$

$$54 =$$

$$38 =$$

$$91 =$$

10

How did you go?
Tick the boxes below to show what you know!

- A friendly number ends in a 0 ☐
- Friendly numbers make maths easier ☐

11

Well done!
Now that you know the basics, let's get started.

Addition
Strategy

Friendly Jumps

Jump to a friendly ten, then
add the rest.

- 1** Jump forward
to a friendly
number.

$$7 + 6$$

- 2** Jump forward
the rest.

Three Piece Puzzle

Cut out the three blue shapes on the bottom of this page and arrange them to fit inside the white shapes.

You can flip, slide or turn the blue shapes, but you must use them all.

Draw your answers inside the white shapes.
